Insertable Form Tool Systems

The Schwanog System for ESCOMATIC® Machines

We introduce a highly productive tooling solution for all ESCOMATIC® machines.

In addition to the cutting tools, we also offer the matching holders for all machine types, from the cam-controlled machines D2, D4, D5, and D6 to the new D2/D5 CNC and NM New Mach machines.

Only for the D2 and D4 machines from Escomatic does the head have to be converted to a hexagonal shaft - but this conversion is technically simple and involves only a small amount of effort. The test series have shown that, in principle, there are considerable benefits under all conditions. Above all:

The more difficult the material to be machined, the higher the tool cost savings!
