EDITORIAL:

Dear business partners,
we are delighted to share a variety of interesting topics from the world of Schwanog with you in this first edition of Schwanog News 2025.

Our full attention is focused on solutions that make you more successful by increasing productivity and efficiency. Like the report on the Schwanog Configurator on today's cover and page 3. We have expanded the Configurator so that you can now efficiently manage your items, receive offers, and place orders online 24/7.

The 7th Schwanog Technology Days from June 4-5, 2025, will certainly be a highlight this year, and we would like to invite you to attend. Please read more about the details on page 2.

In today's technology topic, on page 3, everything revolves around the precise and efficient machining of internal threads on bone screws and bone plates. Our solid carbide whirling tools offer highly productive standard and customized solutions.

Further topics are dedicated to our Christmas fundraising campaign, anniversaries, and apprenticeships, as well as a review of the trade shows.

We wish you a successful spring season and look forward to working with you on exciting projects!

Clemens Güntert - CEO

SCHWANOG

Experts, ideas and innovations:

WELCOME TO THE 7TH SCHWANOG TECHNOLOGY DAYS!

Particularly for medium-sized companies, the personal exchange of ideas and innovations among industry experts is of great importance for market success. The past few months have also impressively demonstrated how rapidly the world is changing and how crucial flexibility and dealing with unexpected challenges are. We are ready to meet these challenges – today and in the future.

That is why we are very pleased to welcome you to our 7th Schwanog Technology Days this year. Once again, this year, technology partners have agreed to participate, each of whom has an impressive company history. These include the industry specialists WTO, TS Deutschland, Göltenbott, Eppinger, Schlenker, BENZ and Zoller.

Join us to discuss the latest technologies, current challenges, practical application examples,

and successful projects which were realized thanks to our innovative solutions. In addition to specialist presentations that offer valuable insights into current trends and best practices, you can also look forward to factory tours where you can experience our technologies and processes firsthand. We are sure you will gain exciting and useful insights.

Your physical well-being will, of course, be taken care of. There's also a competition with attractive prizes – after all, fun is also a must!

We look forward to your participation and an inspiring exchange!

TECHNOLOGY PARTNER

Internal threads on bone screws and bone plates:

SCHWANOG THREAD WHIRLING TOOLS FOR MAXIMUM PRECISION!

Medical and dental technology is one of the industries with the most complex requirements worldwide. These include the highest precision, exceptional resilience, and a guaranteed service life as basic requirements for precision parts.

These challenges also apply, to the same extent, to manufacturers of precision tools such as Schwanog. With global production volumes growing in recent years, productivity is becoming increasingly important when selecting machine tools.

As a specialist in highly productive solutions, we have also specialized in the manufacture of thread whirling tools for internal threads on bone screws and bone plates.

All these criteria were absolute essential in the development of our whirling tools, which benefit us today as we combine cost efficiency, quality and precision in all desired parameters.

Benefit from our expertise: Simply send us your part drawing and we will quickly provide you with a customized tool recommendation!

Technical facts:

- Solid carbide whirling tools for all common round shank holders
- 1 to 4 flutes depending on thread size
- Significant increase in tool life using optimum carbide grades and coatings
- Standard (stocked) thread sizes from M1 to M5 and ANSI sizes
- Specials, i.e. for Buttress / ACME type threads upon request

Christmas fundraising campaign 2024:

SUPPORT FOR THE STERNENKINDER ASSOCIATION!

'Sternenkinder' (star children) is a poetic neologism that refers to children who have reached heaven, or rather the stars, before they were even allowed to see the light of day.

The association Sternenkinder Villingen-Schwenningen has set itself the goal of providing a place for parents and their relatives who have been affected by the death of an unborn child. In doing so, they offer help and support that is unique to us at Schwanog in this form.

Our team therefore collected €950 from all our employees as part of our Christmas fundraising campaign, which our managing director Clemens Güntert doubled to €2,000.

We are happy that our campaign has been so well received by the Sternenkinder association, and we wish them much strength and positive energy for their work.

The Schwanog Configurator impresses with new enhancements:

WITH ONLINE SHOP FUNCTION AS A REAL MILESTONE!

The Schwanog Configurator has become an indispensable tool for optimizing processes for our customers. This digital solution enables us to significantly reduce delivery times for new tools while also offering greater efficiency and flexibility in your production.

A key feature of the Schwanog Configurator is the automated creation of tool drawings. Using predefined templates that can be conveniently selected on our website, individual parameters can be entered to generate customized solutions. In addition to the proven templates for single-lead whirling inserts, configuration options for radial grooving tools are also available.

New functions for even more convenience: Our experts are continuously working on further developing the Configurator. We are therefore even more pleased to be able to present several enhancements to you now – including a real milestone: the new online shop function!

The new configurator tools:

- ❑ **Product overview:** Access your stored items in a password-protected area.
- ❑ **Drawing management:** All tool drawings can be viewed, saved and printed.
- ❑ **Price overview:** Retrieve prices of your stored items at any time.
- ❑ **Direct quote request and ordering:** Use the shop function to quickly place orders or request quotes online.

With these innovations, we are making the Schwanog Configurator an even more powerful tool for our customers. Try out the new functions and benefit from optimized digital order processing!
Use the full potential of the new Schwanog Configurator!

Benefit from all the advantages now:

Long-standing employees guarantee success:

CONGRATULATIONS ON YOUR 10TH ANNIVERSARY!

Our long-standing employees are a guarantor for success and a stable pillar for our company with their tireless commitment and extensive experience. We are even more pleased to honor three employees for their 10th anniversary.

Georg Gür / Schwanog Germany

Georg Gür started at Schwanog on December 1st, 2014, and has enriched our team as an experienced tool grinder. He had previously successfully completed an apprenticeship as a toolmaker and subsequently gained his first professional experience.

Today, Georg Gür is 33 years old and decided in 2023 to take further training to become an industrial foreman. We fully support this step and wish him every success! In doing so, Georg is demonstrating how Schwanog opens the doors to training and further education to every employee. Georg Gür loves spending his free time playing soccer, where he immerses himself fully in the game, and skiing, where he enjoys the fresh mountain air and speed.

Gregory Carnevale / Schwanog France

As a technical field representative for the south-eastern region, Gregory Carnevale found a new challenge at Schwanog France 10 years ago. His professional development began with an apprenticeship as a lathe operator on multi-spindle CAM-type machines at a large, well-known company in the Arve Valley. During his twenty years of service, Gregory continued to develop his skills and managed the turning shop for a long time as well.

During this time, he got to know and appreciate Schwanog, which ultimately led him to join our company. Gregory says he enjoys his work just as much as he did on his first day. His hobbies include road trips with his wife on motorcycles, ski tours, and hunting.

Malia Foreman / Schwanog USA

Malia Foreman has become an integral part of Schwanog USA. She started at Schwanog USA in January 2015 and looks back on an eventful professional past. Before joining Schwanog, she held various positions in customer service but also worked as an emergency medical technician and in real estate.

At Schwanog, Malia is responsible for accounts AP/AR, purchasing, human resources, and office management. Malia finds relaxation from work by taking long walks in nature. She enjoys playing disc golf and spending her free time with friends and family.

Apprenticeships secure our common future:

REVIEW AND OUTLOOK!

Apprenticeships secure our common future! With this guiding principle, our apprentices again participated in the Jobs for Future trade show, which took place from March 13th to 15th, 2025 in Villingen-Schwenningen. The Jobs for Future trade show has established itself as an event for jobs, as well as apprenticeships, and continuing edu-

cation. Of course, we once again took the opportunity to present ourselves as an innovative company offering international career opportunities. With our eye-catching booth and the refreshing appearance of our apprentices, we were able to interest and inspire many young people in Schwanog. This also applies to the apprentices who joined Schwanog in September 2024, whom we would like to briefly introduce to you today.

Left to right: Silas Guhl, Emanuel Bekiropoulos, Bogdan Baciú und Xenia Di Domencia

Our new apprentices:

Apprenticeship as a metal cutting machine operator:

- Silas Guhl
Age: 17 years
Hobbies: motorcycling, playing the drums
- Emanuel Bekiropoulos
Age: 16 years
Hobbies: Horseback riding, motorcycling and voluntary firefighter

Apprenticeship as an industrial clerk with additional qualification:

- Xenia Di Domenica
Age: 20 years
Hobbies: Swimming and reading

Apprenticeship as a warehouse logistics specialist:

- Bogdan Baciú
Age: 17 years
Hobby: Gym

First successful trade shows in 2025:

SUCCESSFUL TRADE SHOW APPEARANCES WORLDWIDE!

The first trade show appearances this year have already demonstrated once again how important personal contact is despite all digital progress. This enabled us to deepen discussions, formulate requirements, and initiate specific customer projects.

We are particularly pleased that we were able to take this feedback with us across the globe for example, at the Shot Show, Las Vegas, Nevada, USA, Expo Manufactura, Monterrey, Mexico, CME, Shanghai, China, MECSPE, Bologna, Italy, Global Industrie, Lyon, France, PMTS 2025, Cleveland, Ohio, USA and DST, in Villingen-Schwenningen, Germany.

Global Industrie, France

CME, China

PMTS 2025, USA

Shot Show, USA

EXPO Manufactura, Mexico

Our exhibition teams are ready:

PREVIEW OF THE NEXT EXHIBITION HIGHLIGHTS!

After the successful trade shows in the first few months of the year, we are already preparing the next trade show highlights in the USA and Germany.

We cordially invite you to these events and you can look forward to inspiring ideas through project presentations and discussions with our experts.
