Innovation and Precision.

Gölte**n**bodt quick-change tooling systems for Tornos GT26 and GT32

Gölte**n**bodt technology GmbH, represented in North America by Schwanog USA, is looking forward meeting you at the Ellison-Tornos Open House on June 6th.

Gölte**n**bodt, is a manufacturer of pre-settable, quick-changeable and coolant fed tooling systems for multiple and single spindle automatic lathes.

The systems provide quick and easy tool changeovers, are 100% pre-settable off the machine, and a repeatability $\leq .0004$ ". The coolant fed holders are designed for high pressure ratings up to 1,500 psi. The rigid design reduces setup times, provide chatter free operation, reliability and increased tool-life, and best of all Gölte**n**bodt's tooling systems do not bound to any cutting tool manufacturer.

Stop by at our booth to learn more about how to increase your productivity by up 40%!
